Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/08/07 has been entered.

Response to Arguments

2. Applicant's arguments, see remarks, filed 6/8/07, with respect to the rejection(s) of claim(s) 1-3, 5-14 and 16 under 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Funnell, et al. alone for independent claim 4, which was not specifically disputed in detail.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 4 is rejected under 35 U.S.C. 102(e) as being anticipated by Funnell et al. (Funnell), US Pub. No. 2005/0086466.

Regarding claim 4, Funnell discloses a method of preparing a message for transmission to a user equipment in a UMTS communications system, the message including a Ciphering Mode Info information element, the method comprising determining whether radio bearers exist using radio link control (RLC) transparent mode (TM) (see page 4 [0048]); and if they do exist, determining whether the message is one of a plurality of message types for which a Ciphering Activation Time for DPCH information element is to be included, the plurality of message types comprising a Radio Bearer Setup message, a Radio Bearer Reconfiguration message, a Radio Bearer Release message, a Transport Channel Reconfiguration message, a Physical Channel Reconfiguration message, a Cell Update Confirm message, a URA Update Confirm message and a UTRAN Mobility Information message (reads on RRC messages); and in the event the message is one of said plurality of message types, including the Ciphering Activation Time for DPCH information element in the message ([0009-0012] and [0031-0034] and [0048-0049]).

Allowable Subject Matter

5. Claims 1-3,5-14,16 are allowed.
6. The following is a statement of reasons for the indication of allowable subject matter: Prior art fails to explicitly disclose wherein if the Ciphering Activation Time information element is not present, returning a message including the absence of the

information element or selecting an activation time for applying the ciphering change for the transparent mode radio bearers.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joy K. Contee whose telephone number is 571.272.7906. The examiner can normally be reached on Monday through Friday, 5:30 a.m. to 2:00 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Appiah can be reached on 571.272.7904. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
